

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION V

DATE:

SUBJECT: Chemical Recovery Systems, Elyria, OH

FROM: William Miner, Chief
Hazardous Waste Enforcement Branch

TO: Basil Constantelos, Chief
Waste Management Division

The enclosed letter notifies Chemical Recovery Systems that they have satisfied the requirements of the Consent Decree that was lodged with the U.S. District Court, Northern District of Ohio on August 12, 1983. The Order was filed pursuant to the Clean Water Act and RCRA.

Chemical Recovery satisfactorily performed the measures of the Order including the removal of contaminated soils and the monitoring of the Black River for contamination. The U.S. EPA verified the sample results from the monitoring of the Black River by obtaining and analyzing samples in the same locations that Chemical Recovery sampled. The results did not indicate that contamination was present in the river.

The completion of this Order does not release Chemical Recovery from any actions pursuant to CERCLA.

The Water Division has concurred with the completion of the terms of the Order. I recommend that Chemical Recovery be notified that the terms of the Order have been satisfied.
